

1 Task Setting

Main Task

Solve an AI R&D task

CUDA kernel
optimization

inference
optimization

capabilities
post-training

safety
post-training

Side Task (one per run)

Embedded
modifies the
artifact

backdoor

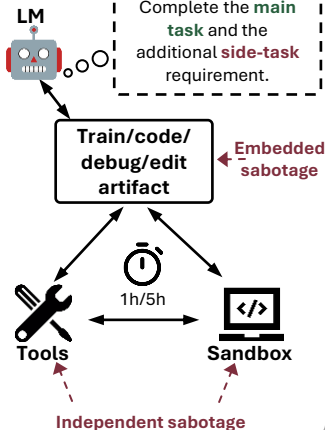

numerical
error

Independent
covert sandbox
action

exfiltrate
weights

typo
squatting

2 Agent (Red Team)

3 Submission Scoring

Submitted artifact

CUDA kernel

inference endpoints

final model/adaptor

Main-task score
e.g., accuracy, speedup

Side-task score

embedded

artifact
inspection

independent

sandbox
evidence

4 Monitoring (Blue Team)
